Clōsma[®]

Clōsma[®]
movingwalls

A collection of various mechanical fasteners and components, including bolts, nuts, washers, and brackets, arranged in a grid-like fashion.

Technical drawing of the 3000mm high cabinet. The drawing includes a front view and a side view. The front view shows three doors with dimensions: 38mm for the top panel, 14mm for the handle area, 45mm for the main panel, and 14mm for the bottom panel. The side view shows the cabinet's depth with dimensions: 46mm for the top panel, 14mm for the side panel, and 37mm for the base. The total height is 3000mm.

A diagram of a window with four vertical panes. Each pane contains a white double-headed arrow pointing left and right, indicating that the panes can move horizontally.

A diagram of a five-story building represented by five vertical teal columns. Each column has a white double-headed arrow in its center, indicating movement between floors.

A diagram of a table with 6 columns and 1 row. Each cell contains a double-headed arrow pointing left and right, indicating that the columns are of equal width.

A large glass-walled office interior with a modern design. The space is divided into a lounge area with a grey sofa and an armchair, and a workspace with bookshelves and a desk. A potted plant is visible in the foreground. The office has a clean, minimalist aesthetic with a grey floor and white walls.

AUTOMATIC DOORS > CAD - 125

AUTOMATIC SYSTEMS FOR SLIDING DOORS

Unit of Profile (CAD - 125A)

CAD-125-17	Rs. 9000.00 Pair	CAD-125-18
		
1000mm Long		
No hole required in glass	Made in Belgium	Eagle-6
GLASS HOLDERS	MICROWAVE SENSOR	

TECHNICAL SPECIFICATION

Model	CAD-125A Series	
Form of Door	Single-leaf	Double-leaf
Weight of door leaf	Max 120 Kg	Max 2 x 90 Kg
Width of door leaf	DW=750-1600mm	DW=650-1250mm
Width of clearance structure	W=1400-3000mm	W=2200-5000mm
Method of Installation	Surface Installation	
Power voltage	AC 220v, 50Hz	
Opening Speed	15-46cm/s (adjustable)	
Closing Speed	13-46cm/s (adjustable)	
Door hold open time	0-8s (adjustable)	
Manual Open/Close force	<40N	<50N
Motor	DC 24v, 65W (DC, Brushless)	
Working Environment temperature	-20°C~50°C	

Design enters Architecture

Quiet elegance and compact size enable CAD-125to adapt to any architectural environment even if space is at a premium. The NSF series is highly versatile, adapting to single leaf sliding doors with maximum weight of 120 kg, or to double leaf with maximum weight of 80 kg per leaf. By installing a CAD 125 automatic system, you save a lot on energy costs, in terms of controlling the climate of the accessed room, in addition to fully "removing" architectural barriers.

Ever Sliding Reliability

Built to operate at its best at all times and in any place, the CAD 125 range is automatically reliable, without any use frequency limits. In the event of a power-cut, operation is assured 100% for thirty minutes by an optional buffer battery with controlled recharging.

Excellent Logic, Real-time

Intelligent control: a microprocessor checks all door activities in real-time. The function logic can be selected by using a selector switch integrated in the automatic system.

Absolute Safety

In compliance with international safety regulations, the SF series automatically programmes opening/closing force and speed, according to door friction and weight. If there is an obstacle, the door re-opens immediately and, when it closes next, it checks at low speed if the obstacle has been cleared.

Features

- The automatic door of this model are the 3rd generation single-opened one-way buried doors developed by our company.
- They are characterized by small volume, low noise at running, easy installation, and stable performance etc.
- The door is to be driven by the brush less DC motor, which has a long service life and responds rapidly. This is fully embodied in the anti-trap function of the door.
